I had the exact same thought – let the CAG review and comment but we have the final approval.

I don't have the TDD (and honestly not familiar with it or its function) – so meeting would be a good idea. Belinda is the person who coordinated all of the TASC stuff to get it running.

Thanks for passing these along. Let's get together to review the TDD (tasking document for TASC services). If TASC is preparing documents for the public, our senior managers need to be aware and in the approval loop.

Regarding CAG review and comment, I am fine with that since Terrie is producing documents the CAG has requested. It makes sense for them to have a chance to see it before it gets finalized in order to ensure it meets their needs. But since the docs have EPA's name on them, EPA needs to maintain final approval.

Hi Mary,

What are your thoughts about the CAG reviewing and commenting on these documents prior to public release? This is new territory for me.

Subject: TASC fact sheets for review

Hi Dan and Ben,

Attached is a fact sheet about the ground water at the West Lake Landfill and a fact sheet about units of measure. These are draft copies for your review. We included the Oct 2013 sampling results in the fact sheet and understand that we can't release the fact sheet to the CAG until EPA posts the Oct monitoring report. We hope the report will be posted soon, as the CAG would like more information as soon as possible.

Thank you for looking at these documents. We appreciate your knowledge and long history with the site and willingness to let us know if there are any technical errors in the documents. The CAG has also requested an opportunity to review and comment on the documents before release to the general public. That is the next step for these documents.

Terrie
